

## Quotes from our C-SHIP Students:

**“When I applied to CSHIP I had just barely considered Dentistry as a future career. Thanks for this internship, I am confident I want to be a dentist and practice in Vermont. You have given me the opportunity to shadow at four different offices, meet several successful dentists and see dental care in a public health setting with one of the most genuinely kind women I have ever met!”**

**-Eve Pomazi 2019**

Eve and Jenna completed their C-SHIP internships in the Summer of 2019, each logging over blank hours. When asked to reflect on their internships, each had good things to say about the organizations they worked for, and each expressed a newfound perspective on the healthcare workforce.

**“ I learned a lot about hospice care from this internship, that which I never would have known if I did not have this experience. This internship taught me that Geriatrics definitely could be a field of medicine I would pursue further to learn more about.”**

**-Jenna Eaton, 2019**
